

Student Name: _____ Class: _____ Date: _____

Before watching the *Walleye Biology* video, or exploring the website, review these questions and look for answers during the video.

1. What information can fisheries biologists provide that are useful for walleye fishing?

2. List the tools that fisheries biologists use and what organisms they study.

3. Sketch the organisms that fisheries biologists study in aquatic ecosystems.

4. Why is it important that fisheries biologists study the itty-bitty micro-organisms?

5. Describe what a food web is and the main categories of a food web.

6. What is an apex predator and where is it located in the food web?
